

OVERVIEW

eWorks was established in 2009 with a primary mission to teach, support and advocate for individuals with intellectual and other developmental disabilities, empowering them to make life choices, exercise independence and develop responsibility to become productive members of the community. eWorks achieves this mission by providing competitive recycling, refurbishment and resale services of office technologies and consumer electronics; basically “if it plugs into a wall we’ll take it”. This includes items such as computers, tablets, servers, monitor/display screens, scanners, copiers, network equipment, power supplies, TVs, stereos, cell phones and household appliances.

Today the eWorks program provides electronics recycling and refurbishment services for local communities and for large global corporations across the US. eWorks also serves as the back office-processing center for several other national recyclers. Our process uses the highest industry standards in safety and security, as well as, provides “green tech” jobs for the disabled.

eWORKS SERVICES

Electronics Recycling As a zero-landfill organization eWorks responsibly recycles assets in compliance with local, state and federal regulations.

eCart™ & eCarton™ Transport and Storage For convenient and secure collection and transport of electronic assets with easy online scheduling for pick-ups.

Product Resale Services Are for technology products that can be resold in the aftermarket, with the eWorks client sharing in the proceeds

The service includes:

- Audit and repair (if needed) services or part harvesting to extend the useful life of the asset.
- Data Security and Data Eradication services compliant with U.S. Department of Defense and NIST standards to assure data privacy for retiring assets.

Donation Programs Providing great tax incentives to companies and individuals while benefiting those in need.

Shredding Services In addition to dismantling and part harvesting, eWorks provides full shredding services.

BENEFITS OF eWORKS

- eWorks accepts a vast array of electronics for reuse and recycling
- eWorks has a large fleet of vehicles so assets are collected from all over the greater Chicago area.
- eWorks offers multiple convenient drop off locations throughout the greater Chicago area.
- eWorks has a national presence to provide consistent processing services throughout the United States
- All equipment is processed in accordance with today’s strict electronic waste standards. eWorks only uses BAN or EPA R2/RIOS certified recycling processors.
- The eWorks facility has 24 hour camera surveillance and metal detectors to monitor anyone going in and out of the work area.
- eWorks is a not-for-profit so all revenue received will go to support workers with Developmental Disabilities and Autism.
- eWorks offers a “green” advantage and significant tax benefits to businesses and individuals through the use of its services.

Innovative Electronics
RECYCLING SOLUTIONS

for the responsible disposal of electronic waste

Contributing
TO THE COMMUNITY

by helping disabled workers find quality jobs

PRODUCT VALUE MAXIMIZATION

eWorks possesses the technical expertise required to refurbish and repair products to their maximum value for resale.

eWorks certified technicians perform full functional tests on items of value and, if necessary, fix or replace components to bring them back to full functionality. Also, if data resides on any storage media or device it is overwritten to U.S. Department of Defense and NIST standards providing thorough liability protection to asset owner's requirements.

This way, our customers can rest assured each asset we process will be brought back to a condition that will recoup value in a safe and effective way.

RESPONSIBLE RECYCLING

For products that have exceeded their useful life, eWorks has teams of individuals with developmental disabilities dismantling their components into separate material streams for environmentally safe and responsible recycling.

eWorks processes adhere to the strictest standards in the industry and meet all local, state and federal regulations. We are R2 and ISO Certified and only utilize downstream partners that are certified as well. At the same time, providing jobs to those less fortunate from affiliated organizations such as Misericordia and the AHRC.

INFORMATION CONTROLS AND REPORTING

eWorks maintains clear identification and control of items throughout from collection through processing and final disposition whether resale or recycling via its sophisticated data management system.

Reports are available indicating the amount of items and/or poundage of material received along with final disposition. These reports offer the necessary audit trail required to properly manage end of use items and accounting. Each customer can select the level of detail they require for their particular reporting needs.
